DATE : 08/04/2026

Completed the project named as,
01: SkyWings Travel Agency - Booking & Revenue Analytics

Q1

[Reporting] Create a detailed tabular report in IBM Cognos showing total bookings and revenue grouped by Package Type (Flight, Hotel, Combo). Apply a Header with the agency name and report date, a Footer with page number, and use Blue font color for column headers with Arial font, size 12. Add a prompt so managers can filter the report by Branch City.

SkyWing Travel Agency

Q2 [Reporting] Build a summary report listing the Top 10 Destinations by Revenue. Apply Conditional Styling so destinations generating revenue above ₹5,00,000 appear in Green, between ₹2,00,000–₹5,00,000 in Amber, and below ₹2,00,000 in Red. Add the report to Team Content with a meaningful description.

Destination	Final Revenue
Ooty	929329
Maldives	876023
Andaman	792312
Goa	756134
Bangkok	685896
Singapore	675517
Manali	577804
Leh	556903
Kerala	487228
Shimla	423203
Rajasthan	358388
Dubai	259648
Overall - Total	7378385

Description:

- A summary report was created to display the **Top 10 destinations based on total revenue**. Revenue was aggregated using the sum function and the data was sorted in descending order. A Top 10 filter was applied to show only the highest revenue-generating destinations.
- Conditional styling was applied to the revenue column to highlight performance levels: destinations with revenue above ₹5,00,000 were displayed in **green**, those between ₹2,00,000 and ₹5,00,000 in **amber**, and those below ₹2,00,000 in **red**.
- The report was saved in **Team Content** with the name *Top 10 Destinations by Revenue* and a description stating that the report highlights the highest-performing destinations using color-coded revenue indicators for quick and effective business analysis.

Q3

[Reporting] Using Report Visualize Prompt, create a visualization report that allows the end user to select the chart type (Bar, Line, or Pie) to view Monthly Revenue Trends for the current year. Summarize the total revenue and average booking value at the bottom of the report.

Average Booking Value: ₹ 614865.4167 Total Revenue: ₹ 7378385

Q4

[Exploration] Using Cognos Analytics Exploration, upload the agency's booking dataset and explore the relationship between Customer Age Group and Package Type. Identify which age group generates the highest revenue during Peak Season versus Off-Peak Season and document your key findings.

Peak season:

Off-Peak Season:

Q5

[Dashboard] Design an Executive Dashboard for SkyWings management containing: (1) A KPI tile for Total Revenue this year, (2) A Bar chart showing Revenue by Destination, (3) A Line chart for Monthly Booking Trends, (4) A Pie chart for Package Type split. Add a City filter widget so the entire dashboard responds to the selected city.

Q6

[Story Making] Create a Cognos Analytics Story (presentation) for the SkyWings Annual Business Review with the following scenes: Scene 1 — Company Overview & Total Bookings, Scene 2 — Top Destinations Performance, Scene 3 — Peak vs Off-Peak Revenue Comparison, Scene 4 — Customer Satisfaction Ratings, Scene 5 — Recommendations for Off-Peak Strategy. Add meaningful text annotations to each scene.

7: Using AI Assistant to build the dashboard creation:

✈️ SkyWing Travel Agency – IBM Cognos Analytics + DeepSeek AI Project

SkyWing Travel Agency is an intelligent travel analytics platform built using **IBM Cognos Analytics** and enhanced with **DeepSeek AI** prompt-based insights. The project focuses on transforming travel data into meaningful visualizations, predictions, and personalized recommendations for customers.

🔗 Project Overview

SkyWing Travel Agency leverages the powerful reporting and dashboard capabilities of **IBM Cognos Analytics** combined with **DeepSeek AI** to create a smart travel decision system. The platform analyzes customer preferences, booking trends, seasonal demand, and pricing patterns to help both travelers and agencies make better decisions.

📊 Role of IBM Cognos Analytics

IBM Cognos Analytics is used for:

- 📊 Creating interactive dashboards and reports
- 📅 Analyzing booking trends and seasonal demand
- 💰 Monitoring revenue, pricing, and profitability
- 👤 Understanding customer segmentation
- 🔍 Generating data-driven insights for decision-making

🌟 Key Features

- 🤖 Smart travel recommendations using AI
- 📊 Dynamic dashboards and visual reports
- 📈 Predictive analytics for future travel trends
- 💡 User-friendly interface for easy exploration
- 🔄 Real-time data analysis and updates

🔧 Technologies Used

- IBM Cognos Analytics 📊
- DeepSeek AI 🤖
- Data Visualization Tools 📈
- Prompt Engineering 📝
- Travel Dataset (Bookings, Customers, Destinations) 🌐
